freelancer@experten-zentrum.tech

Gudrun worked as professional photographer for the Allianz Center for Technology (AZT) since 1988.

Her task was the photographic documentation of damaged components and fracture surfaces at the laboratory of AZT. This implied photos in her own photo studio, but also mobile photography in the lab as well as onsite.

Since the integration of AZT into the Allianz Global Corporate and Specialty (AGCS) in 2008, she was additionally responsible for the photographic documentation of meetings or events within the AGCS.
